

BRAND AND DESIGN PACK

Everything care. One connected hub.

The identity, design system and messaging for CuraHub, the operating system for modern care services. Use this pack for the web platform, mobile app, family portal, proposals and every document that carries the name.

Contents

- 01 Brand foundation
- 02 Logo system, versions and use
- 03 Colour system and contrast
- 04 Typography
- 05 Platform architecture and modules
- 06 Messaging, voice and tone
- 07 Digital principles
- 08 Design tokens and components
- 09 Product applications
- 10 Brand applications
- 11 Adopting the name

What CuraHub represents

A central operating system for modern care services. Cura comes from the Latin word for care. Hub is the single connected place where care operations, people, residents, families and decisions come together.

BRAND PROMISE

Make care operations clearer, more connected and easier to act on.

PERSONALITY

Human, capable and quietly confident.

Warm enough for families. Credible enough for operators, commissioners and multi-site care groups.

WHO IT SERVES

- Registered managers and home managers
- Group operators and regional directors
- Care teams, nurses and support staff
- Residents and their families
- Commissioners and inspectors, indirectly

The name

Write it as **CuraHub**: capital C, capital H, no space. Never Cura Hub, Curahub or CURAHUB in running text. The company and the platform share the name. Modules take the name as a prefix, for example CuraHub Workforce.

The idea in one line

One source of truth for a care service, with the people around it connected to it. Everything in this pack, from the open C in the logo to the teal reserved for actions, follows from that idea.

The connected care hub

The open C is care that stays accessible and human. The teal node at its centre is CuraHub: one source of truth. The two connected nodes are the people and relationships around every service, residents and families, teams and operators.

Primary

Navy ring and wordmark, teal hub. Use on white, Cloud or Soft Aqua.

Reversed

White ring and wordmark, teal hub. Use on CuraHub Navy or Deep Navy.

Construction

The wordmark is Manrope ExtraBold 800 with tightened tracking. The icon sits at cap height and the gap between icon and wordmark is one-quarter of the icon width.

One mark, five approved versions

Every version is built from the same geometry. Choose by background, then by available colour. Nothing else is approved.

Icon, primary

App icons, favicons, avatars, social profiles.

Icon, reversed

On Navy or Deep Navy grounds.

Mono navy

Single-colour print, embossing, stamps.

Mono white

Photography overlays and dark video.

Mono teal

Decorative use only, never as the main identifier.

HORIZONTAL LOCK-UP

Default for headers, documents and proposals.

STACKED LOCK-UP

Square placements, app splash screens and badges.

SINGLE-COLOUR WORDMARK

Use below 140 px, in one-colour print and in body-text contexts.

Consistency protects recognition

Clear space

Keep a margin of at least one-quarter of the icon width (x) clear on every side. Nothing enters this space: no text, rules, photography or other logos.

Minimum size

- Horizontal** 140 px digital, 35 mm print
- Stacked** 96 px digital, 24 mm print
- Icon alone** 32 px digital, 8 mm print
- Below 140 px** Switch to the single-colour wordmark

File formats

SVG for digital products and print-ready vector work. PNG at 2x and 3x for office documents and email. Never a JPEG on a coloured background.

Do not

Stretch or squash

Rotate

Recolour

Add shadows or gradients

Retype the wordmark

Crop the icon

Navy for trust, teal for action

Six core colours. Navy and Deep Navy carry structure and authority. Teal is spent on actions, links and connection, so it stays meaningful. Soft Aqua and Cloud keep interfaces calm.

• CuraHub Navy

#08275A

Primary brand, navigation, headings, primary text on light grounds.

RGB 8 39 90 · CMYK 100 78 24 22

• CuraHub Teal

#08BDB8

Actions, links, connection and positive emphasis. Fills and icons, not small text on white.

RGB 8 189 184 · CMYK 72 0 32 0

• Deep Navy

#041A3E

Premium backgrounds, app sidebar, high-contrast text and text on teal.

RGB 4 26 62 · CMYK 100 84 36 42

• Soft Aqua

#DDF7F5

Warm panels, selected states and gentle highlights.

RGB 221 247 245 · CMYK 12 0 4 0

• Cloud

#F6F8FA

Application backgrounds and separation between surfaces.

RGB 246 248 250 · CMYK 2 1 0 0

• Graphite

#263449

Body copy, labels and supporting information.

RGB 38 52 73 · CMYK 78 62 40 24

Working colours for product interfaces

The six brand colours need supporting tints, a text-safe teal and four status colours to build real screens. These are the only additions permitted.

Teal in text

CuraHub Teal fails WCAG contrast on white, so it is never used for links or text under 24 px on light grounds. Use **Teal Ink** for links and text, and keep CuraHub Teal for fills, icons, the logo and dark grounds.

CuraHub Teal text on white

2.3 : 1 · fails

Teal Ink #067F7B on white

4.8 : 1 · AA

Clear, modern and highly readable

Manrope carries headings, campaigns and high-impact statements. Inter carries the product interface, body text, forms, tables and operational information. Both are open source and free to use in product and print.

WORKFORCE · ATTENDANCE

Manrope

AaBbCc 0123456789

Semibold 600 and ExtraBold 800

Headings, numbers on dashboards, campaign lines and the wordmark.
Tighten tracking slightly above 26 px.

Inter

AaBbCc 0123456789

Regular 400, Medium 500, Semibold 600

Interface, body copy, forms and tables. Turn on tabular numerals wherever
figures sit in columns.

Rules

- Sentence case for headings, buttons and labels. Uppercase only for short eyebrow labels with letter-spacing.
- Short headings, plain English, no jargon. Running text stays under 70 characters a line.
- Where brand fonts are unavailable, use Arial or Helvetica. Never substitute a serif or decorative face.

One brand with six connected modules

Each module is a focused part of one connected platform, never a separate sub-brand. Medication management sits intentionally outside this architecture.

CuraHub Family

Secure family updates, photos, communication and meaningful visibility into care.

CONNECTION AND REASSURANCE

CuraHub Compliance

CQC readiness, training, documents, policies, audits and workforce compliance.

CONFIDENCE AND READINESS

CuraHub Occupancy

Enquiries, admissions, resident administration, assessments and occupancy oversight.

GROWTH AND CONTINUITY

CuraHub Workforce

Rotas, attendance, clocking, leave, absence, agency control and staff records.

PEOPLE AND DEPENDABLE
DELIVERY

CuraHub Pay

Timesheets, billing inputs, payroll preparation, rates and financial administration.

ACCURACY AND CONTROL

CuraHub Insights

Dashboards, trends, exceptions and decision-ready operational reporting.

CLARITY AND ACTION

Naming modules

Always the full form on first mention: CuraHub Workforce. In navigation and inside the product, the short form Workforce is fine because the master brand is already present.

Module marks

The letter tile is a wayfinding device, not a logo. Navy tile, teal letter, Manrope ExtraBold. It never appears with the CuraHub icon at the same size and never on external materials on its own.

Adding a module

A new module needs a one-word name, a two-word value statement and a single letter that is not already taken. It joins this sheet before anything ships.

Simple language for a complex operation

PRIMARY LINE

Everything care. One connected hub.

POSITIONING

The complete operating system for modern care services.

SUPPORTING MESSAGE

Manage residents, occupancy, compliance, staffing, payroll, performance and family engagement from one connected platform.

FAMILY LINE

Closer to the moments that matter.

BRAND PROMISE

**Clearer operations. Better connections.
More time for care.**

How the lines are used

- The primary line sits with the logo on covers, website heroes and event materials. It is never rewritten.
- The positioning line is the one-sentence answer to “what is CuraHub?” in proposals, bios and app store listings.
- The family line belongs to CuraHub Family and the family-facing app only.

Human, clear and quietly confident

Human

Speak about people before processes. Warm does not mean sentimental.

Clear

Plain English, active verbs, short explanations. Make the next action obvious.

Confident

Assured and evidence-led, without exaggeration or empty superlatives.

Operational

Show how the platform improves daily work, oversight and decisions.

Inclusive

Write for residents, relatives, care teams, managers and group operators.

Say this

- "Three training certificates expire this month. Book renewals now."
- "Your rota for next week is published. Two night shifts are still open."
- "Margaret enjoyed the garden this afternoon. Here is a photo from the team."
- "Occupancy is 94%, up two beds on last month."

Not this

- "Leverage our best-in-class compliance engine to revolutionise your outcomes."
- "ALERT: CRITICAL ROTA GAP DETECTED."
- "Your loved one's wellbeing journey has been updated in the system."
- "Unfortunately an error has occurred. Please try again later."

Designed around action and trust

Seven rules every screen is checked against before it ships. They apply to the web platform, the mobile app and the family portal equally.

One obvious primary action per screen.

One teal button. Everything else is secondary or tertiary.

Teal for actions and emphasis, not long text.

Links and text use Teal Ink. Paragraphs stay Graphite.

Pair every status colour with a word or icon.

Colour alone is never the signal.

Generous spacing and calm, uncluttered layouts.

Use the 8-point grid. When in doubt, add space.

Make exceptions, deadlines and risks visible without alarm.

Surface what needs attention first, in a measured tone.

Real care settings and genuine human moments in photography.

No stock handshakes, no staged smiles, no stethoscope close-ups.

Meet WCAG 2.2 AA and design accessibility in from the start.

Contrast, focus states, keyboard paths and 44 px touch targets.

The test

Could a registered manager on a night shift understand this screen in five seconds and know what to do next?

The numbers behind every screen

Tokens are the single source for spacing, radius, elevation and layout. Designers and developers use the same names, so a decision made once holds everywhere.

Spacing · 4-point base, 8-point rhythm

space-1 to space-8. Component padding uses 12 and 16, section gaps use 24 and 32, page margins use 48 and 64.

Radius

Elevation

Layout

Grid	12 columns, 24 px gutters, 1280 px max content width
Sidebar	240 px expanded, 64 px collapsed, Deep Navy
Breakpoints	600 · 900 · 1200 · 1536
Touch target	44 × 44 px minimum on mobile
Focus ring	2 px Teal Ink, 2 px offset
Motion	150 ms ease-out for state, 240 ms for layout. Respect reduced-motion.

CuraHub Family on mobile

The same system, warmer. Soft Aqua does more work, photography leads, and the tone speaks to a daughter checking in on her mother, not to an operator.

What changes

- Soft Aqua panels replace Cloud for warmth. Deep Navy is used only for the status bar and dialogs.
- Photos are full-bleed within the card and always real. The caption names who wrote the update.
- Headings use Manrope Semibold 600, not ExtraBold, so the tone softens without a second typeface.
- The primary action is quieter: “Send a message”, not “Submit”.

What stays the same

- The master logo, never a separate Family logo.
- Teal for the single primary action and for links via Teal Ink.
- Status always as a chip with a word: “Visit confirmed”, not a green dot.
- Type scale, spacing tokens, radii and focus states.

A flexible identity across product and sales

Always lead with the master CuraHub brand. Module names are descriptors, not competing logos. That keeps one recognisable identity as the platform grows.

App icon and favicon

Deep Navy tile with the reversed icon is the default. The light tile is for platforms that force a white ground.

Proposal cover

Slide and document

Navy rule at the top, logo top-left, Manrope heading, Inter body. Teal appears only in one call-out per page.

Email signature

Plain text, one teal rule, no banners or quotes. The logo is a PNG at 2x.

Moving from the working name to CuraHub

The visual system carries over unchanged. The name touches more places than it seems, so work through this list before anything public goes out.

Protect it first

- ☐ Clearance search at the UK IPO in classes 9, 42 and 44, and check similar marks such as Cura, CuraHub and Cura Systems already trading in UK care software.
- ☐ File the UK trade mark for the word and the icon once the search is clear.
- ☐ Companies House name check and change, or a new trading name registered.
- ☐ Domains: curahub.co.uk and curahub.uk as a minimum, with .com if available. Note that curahub.app is already in use by another product.
- ☐ Social handles on LinkedIn, X, Instagram and Facebook secured on the same day.

Then switch the product

- ☐ App names, bundle identifiers and store listings on iOS and Android.
- ☐ Product name, email sender name and from-address on every automated message.
- ☐ Login page, favicon, browser title and PDF exports.
- ☐ In-app help, onboarding copy and release notes.
- ☐ API names, subdomains and status page.

Then everything else

- ☐ Proposals, contracts, DPIA and data processing agreements.
- ☐ Email signatures, letterheads, invoice templates.
- ☐ Website, pitch deck, one-pagers and case studies.
- ☐ Existing customers told once, clearly, with the reason and the date.
- ☐ Old name redirected for 12 months, then retired.
