

INTRODUCING CURAHUB

Everything care. One connected hub.

The complete operating system for modern care services. Residents, occupancy, compliance, staffing, payroll, performance and family engagement, managed from one connected platform instead of six disconnected ones.

FOR MANAGERS

One screen that shows what needs attention today.

FOR OPERATORS

Every home, every metric, one source of truth.

FOR FAMILIES

Closer to the moments that matter.

Built for UK care providers

Residential and nursing homes, supported living, domiciliary and complex care, and the multi-site groups that run them. Designed around CQC expectations and the way care teams actually work.

THE PROBLEM

Care operations run on too many systems that never talk to each other

A typical home juggles a rota tool, a compliance folder, a spreadsheet for occupancy, a payroll export, an agency portal and a family newsletter. Every handover between them is a place where time, money and confidence leak away.

Today

Rotas in one app, training records in another, occupancy in a spreadsheet, agency bookings by phone, timesheets on paper, families updated by email when there is time.

With CuraHub

One record for every resident, staff member and shift. One place to see what is due, what is unfilled and what is costing money. One update that reaches the family the same afternoon.

1

platform, one login, one set of data for the whole service

6

connected modules that share the same records

0

re-keying between rota, timesheet, payroll and invoice

What you can expect

Secure by design

UK data hosting, role-based access, a full audit trail and GDPR-ready data processing agreements.

Accessible for every team

Built to WCAG 2.2 AA. Works on the office PC, a tablet on the floor and a carer's phone.

Human implementation

A named implementation lead, data migration from your current tools and training for every role.

Clearer operations. Better connections. More time for care.

Six modules. One platform.

Start with the modules that solve today's problem and switch on the rest as you grow. Every module works from the same resident, staff and shift records.

CuraHub Workforce

- Rotas, attendance and clocking in one view
- Leave, absence and staff records
- Agency control with rates and spend tracked per shift

CuraHub Compliance

- CQC readiness with evidence in one place
- Training, DBS and right-to-work expiry tracking
- Policies, documents and audits with reminders

CuraHub Occupancy

- Enquiries, assessments and admissions pipeline
- Resident administration and funding details
- Occupancy oversight across every home

CuraHub Pay

- Timesheets generated from real attendance
- Rates, enhancements and billing inputs
- Payroll preparation without re-keying

CuraHub Insights

- Dashboards for home, region and group
- Trends and exceptions surfaced automatically
- Decision-ready reporting for boards and commissioners

CuraHub Family

- Secure updates and photos from the care team
- Two-way messaging and visit booking
- Meaningful visibility into a loved one's care

Deliberately not included

Medication management sits outside CuraHub. We integrate with the eMAR you already trust rather than asking you to change it.

Designed around action and trust

CuraHub shows exceptions, deadlines and risks without creating alarm, and makes the next action obvious.

Monday morning, registered manager

W

Two night shifts unfilled on Saturday. One tap offers them to bank staff, then agency.

● Unfilled

C

Three training certificates expire this month. Renewals booked from the same screen. ● Due soon

O

A new enquiry from the hospital discharge team is already in the admissions pipeline.

F

Yesterday's garden photos reached 14 families before the evening. ● Sent

Friday afternoon, group operator

I

Occupancy, agency spend and compliance for all six homes on one dashboard, with the exceptions on top.

P

Timesheets approved from real clocking data. Payroll file ready without a spreadsheet.

C

Inspection evidence for any home exported in minutes, not days.

W

Agency usage down where bank staff were offered shifts first.

Who CuraHub is for

Single homes

A registered manager who wants rota, compliance and occupancy in one place without a big IT project.

Multi-site groups

Operators who need the same numbers for every home and exceptions surfaced before the monthly board pack.

Supported living and domiciliary

Services where staff, visits and records are spread across many locations and need one connected view.

Complex care

Providers with specialist staffing, high compliance demands and families who expect to be kept close.

NEXT STEPS

See CuraHub with your own homes in it

A 45-minute walkthrough using your rota, your compliance list and your occupancy figures, followed by a pilot in one home before any group-wide decision.

1

Walkthrough

45 minutes, online or on site.
We use your real scenarios,
not a canned demo.

2

Pilot

One home, the two modules
that matter most, six weeks,
with a named lead
throughout.

3

Roll-out

Home by home, with
migration and training
included, and the other
modules switched on as you
need them.
